__AI Solutions Engineer__ who takes enterprise AI systems from technical discovery through production deployment and customer enablement. Architects integration platforms across __Python, FastAPI, n8n, REST APIs, LLMs, and ElevenLabs Voice AI__ — now running in __20+ client environments__, including a WhatsApp commerce platform contributing __~INR 15L (~US$18K)__ in attributed monthly revenue. Partners with founders, clients, and sales teams on solution design, technical demos, and API documentation.

Professional Experience

Brilliant Brains AI Digital Marketing Pvt. Ltd. – AI Solutions Engineer **Jan 2026 – Present**

- Partner directly with founders, clients, account managers, and sales teams across **technical discovery and proposal sessions** to architect AI-powered business solutions ahead of implementation
- Architect and deploy **production AI systems and enterprise workflow automations** now live across **20+ client environments**, integrating Python, FastAPI, n8n, Zapier, REST APIs, Webhooks, OAuth/JWT, OpenAI, Gemini, ElevenLabs, Shopify, Interakt, GoHighLevel, Meta/Google Ads, Mailchimp, and payment gateways
- Standardized **reusable automation frameworks and integration patterns** adopted across multiple client deployments, compressing delivery time for new implementations
- Engineer **production-grade workflows** with structured logging, retries, monitoring, webhook handling, and error recovery for reliability at scale
- Lead design of **AI agents and customer-engagement systems**; author implementation guides and **technical API documentation** for engineering and customer teams

Fiverr – Python Backend Engineer (Freelance, concurrent) **Aug 2023 – Present**

- Delivered **25+ production backend solutions** with **FastAPI and Django** across concurrent global engagements, spanning REST API development, database design, third-party integrations, and deployment
- Diagnosed and resolved API, database, and integration failures in live client systems; standardized issue documentation that **reduced repeat problems by 60%**
- Operated as **sole technical contact** across the full engagement cycle — requirements, scoping, delivery, and handover — while completing a full-time engineering degree

Key Enterprise Systems

AI WhatsApp Commerce Platform – *8 Shopify stores*

- Architected an AI WhatsApp commerce platform spanning customer segmentation and personalized lifecycle journeys — **abandoned-cart recovery, repeat-purchase, post-purchase engagement, and AI-driven retention** — across Shopify, Interakt, n8n, and AI agents
- **One Science Nutrition**: architected the complete WhatsApp commerce automation and revenue-attribution reporting; **currently contributes ~INR 15 lakh (~US$18K) in attributed monthly revenue**

Enterprise Revenue Intelligence Platform – *14 clients*

- Architected a multi-client revenue intelligence platform that unified ad spend, revenue, and customer metrics from **Google Ads, Meta Ads, Shopify, and Interakt** into centralized dashboards via reusable reporting pipelines, eliminating manual reporting
- **Milkvilla** (subscription eCommerce): designed a custom **attribution architecture** establishing measurable Ad Spend → Customer → Revenue tracking; defined attribution rules and authored REST endpoint contracts and API specifications for engineering teams

AI Lead Qualification & Sales Platform – *6 healthcare organizations*

- Architected an AI customer-acquisition platform deployed across 6 hospitals and clinics: **Meta Lead Forms → n8n → ElevenLabs Voice AI → AI qualification → WhatsApp (Interakt) → meeting scheduling → CRM → live sales alerts (Zapier)**; automated qualification and scheduling, reducing manual lead handling

Outbound Sales Engine: Grok → HubSpot → n8n – *in-house sales, live*

- Built an end-to-end **outbound lead-generation engine**: a **Grok (xAI) research bot** qualifies D2C and clinic leads across India, UAE, and UK, verifies business emails, dedups, and writes evidence-backed contacts into **HubSpot CRM**
- Designed the **HubSpot data model** (lifecycle stages plus **33 custom contact properties** for outreach status, replies, meetings, and consent); **12 n8n workflows** run retargeting — xAI-personalized email/WhatsApp sequences, reply/bounce handling, meeting detection, and a consent-checked broadcast engine

Skills

Languages: Python, JavaScript, TypeScript, SQL
AI & Agent Frameworks: OpenAI API, Anthropic API, Gemini API, Claude Code CLI, LangChain, LangGraph, RAG, AI Agents, MCP Servers
Backend & APIs: FastAPI, Django, REST APIs, Webhooks, OAuth/JWT, Swagger/OpenAPI
Automation & Integrations: n8n, Zapier, Shopify, Interakt (WhatsApp Business API), GoHighLevel, Meta Ads, Google Ads, Mailchimp, Payment gateways
CRM: HubSpot CRM (custom property schema, lifecycle stages, Service Key API, communication-preference/consent API)
Infrastructure & DevOps: Docker, AWS (EC2, S3), PostgreSQL, MySQL, GitHub Actions, NGINX, Gunicorn
Developer Tools: Git, GitHub, Postman

Education

Samrat Ashok Technological Institute, Vidisha (M.P.) **May 2026**
Bachelor of Technology in Internet of Things | CGPA: 7.95/10.0

Selected Achievements

- **Smart India Hackathon 2024: 2nd among 88,221 teams** for architecting a scalable backend solution
- **Amazon ML Summer School 2025:** Selected from **60,000+ applicants** (top 5%) for ML systems and scalable backend training
- **Google Developer Group – Technical Lead:** Design and deliver hands-on technical workshops and live demos on Python, API design, and AI for **250+ members**
- **Certifications:** Machine Learning Specialisation (Stanford & DeepLearning.AI); Python (IIT Madras – NPTEL)
